PASSIVE door frame / WPC threshold

The PASSIVE / 75 door frame is a product that uses the advantages of three construction materials, thanks to which the full steel 75 Passive leaf obtained the lowest heat transfer coefficient in the steel door segment manufactured in our country. The aesthetics and durability provided by the laminated aluminum profile combined with the thermal insulation of the PVC strip and the insulation in the form of waterproof plywood is an innovative combination that minimizes heat loss. A perfect complement to the PASSIVE / 75 wooden-aluminum door frame is the modern WPC PASSIVE / 75 threshold consisting of PVC thermoplastic materials and wood fibers. The threshold is equipped with an EPDM gasket and a stainless steel cover. Both products have been registered at the patent office.

The lowest heat transfer coefficient Ud-0.57

For steel doors, this is a great achievement that other steel door manufacturers could not repeat. The 75 Passive door model together with the Passive / 75 door frame and the WPC Passive / 75 door frame are a unique solution, because in addition to the low heat transfer coefficient, they form a stable and reliable construction. All thanks to the new technology used to make the sash, frame and threshold.

PERFECT line

The PERFECT product line is a solution to meet the expectations of the most demanding customers and a response to modern trends in architecture. It is a combination of a completely new method of overpressing, allowing for obtaining a uniform glazing plane with the sash jacket from the outside and an effective glazing frame from the inside. The PERFECT line was first introduced to the market by KMT, and the wing designs were registered at the patent office.

3D Hinges

The product is made of steel, equipped with three-dimensional adjustment, which is made with one key, without having to dismantle the sash. This insert protects against abrasion of the material, and the bearing screws guarantee precise adjustment.

SWAROVSKI ELEMENTS

SWAROVSKI ELEMENTS is a prestigious line of these doors handles. The surface-applied SWAROVSKI glass crystals delight with their brilliance and sharpness of the cuts, giving the entrance door an even more individual and unique character.

Glazing in the door

For the production of glazed doors, P4 safety, toughened or anti-burglary glass is used. Panes with increased burglary resistance of P4 class are panes made of two 4 mm glass panes and four layers of PVB film. This film usually has a thickness of 0.38 mm. The material from which the film is made is a type of synthetic resin characterized by high strength and transparency, which provides the glass with high impact resistance and does not deteriorate the optical parameters of the glazing.
90 SUPERTHERM doors, 90 mm thick, designed for single-family housing with a unique wing construction, in which: glued timber frame along the entire perimeter, thermal break, double felt, six anti-theft bolts, massive 3D hinges and a lock of a reputable German manufacturer are a well thought-out set for every home. Additional sash tightness is influenced by the fourth rebate with a self-closing gasket and a windstop eliminating possible blows. The set includes an aluminum frame filled with foam in three chambers with two seals. Both the door frame and the aluminum threshold have been equipped with a thermal break, which prevents the door from freezing. Model 90 SUPERTHERM fits perfectly with floodlights, the use of which allows the installation of unusual door openings.

Perfect for passive and energy-saving houses, because they are characterized by the best heat transfer coefficient for steel doors on the Polish market Ud = 0.57 complete with the PASSIVE / 75 door frame and the WPC PASSIVE / 75 threshold. The product was awarded at the International Fair. The unique sash construction (75 mm thick), which uses a thermal break and two seals, allows you to eliminate heat loss and reduce energy consumption. The use of transoms or extra beds gives the opportunity to develop unusual assembly spaces, giving buildings a unique character. Optionally, the wing is available with a fourth rebate.

Doors for single-family and multi-family housing. This is an improved version of the 75 PLUS door, thanks to the use of a hook lock that ensures safety and better sealing of the door. The solid construction of the 75 MAX model and very good technical parameters guarantee the satisfaction of every user. It is possible to make a sash with a fourth rebate and to combine it with transoms and extensions.

This is an ideal door for single-family and multi-family housing. Sash thickness 75 mm, a wide selection of frames, designs and colors will meet the expectations of every customer. The doors have a low heat transfer coefficient, which guarantees low heat losses. Their additional advantage is the possibility of combining with transoms and extra beds.

They will not only work as external doors, but also as internal entrance in staircases. Thanks to the use of high class locks (4th or 5th class) and as many as 10 locking points and anti-theft bolts, the anti-burglary class RC2 or RC3 was obtained. The line is addressed to customers for whom the door, apart from the functionality and security assigned to them, is a very important decorative element of a house or apartment. As an option, a steel grille can be inserted into the wing, which allows the use of doors for special rooms, e.g. banks, weapons storage places, etc.

All sashes and frames are made of high quality laminates resistant to weather conditions and are equipped with black gaskets.
ATTENTION
We recommend installing the door in an outward opening version.

Basic Equipment

1. Wing filling
   POLYURETHANE FOAM

LATEST TRENDS IN EXTERIOR DOORS

The wing is made in an innovative pressing technology. The glass is mounted directly on the wing coat in overpressing, thanks to which the plane of the glass has been flush with the plane of the wing.

The new solution definitely improves the aesthetics of the door, it will perfectly match the architecture of modern construction.

From the outside, toughened glass, colored in mass without a glazing frame or with an innovative narrow inox frame that subtly highlights the glazing has been used.

From the inside, a 3.3.1 safety glass with a stainless steel or black frame around the perimeter is used.

GLASS PACKAGE CONSTRUCTION:
1. Toughened / safety glass, Standard glass
2. dividing the chambers
3. Safety glass 3.3.1
Glazed door designs

CONSTRUCTION OF STANDARD WINDOW PACKAGE

Two external glass are safety glass ensuring safety of use (hardened or VSG). The glazing decoration is placed on the inner pane.

CONSTRUCTION PACKAGE GLASS P4

Outer glass and internal are safety glass ensuring safety of use (external hardened, internal hardened or VSG). The outer pane is colored in mass. The chambers are separated by a standard pane.

CONSTRUCTION OF THE PERFECT GLASS PACKAGE

The P4 outer pane consists of two panes of glass of 4 mm thick, connected with four foils of (4.4.2), thanks to which it has increased resistance to breakage. The inner pane is a safe pane ensuring safety of use (hardened or VSG).
Dwie szyby zewnętrzne, to szyby bezpieczne zapewniające bezpieczeństwo użytkowania (hartowana lub VSG). Na szybie wewnętrznej umieszczona jest dekoracja przeszklenia. Zewnętrzna składa się z dwóch tafli szkła o grubości 4 mm, połączonych ze sobą czterema foliami (4.4.2), dzięki czemu ma podwyższoną odporność na rozbicie. Szyba wewnętrzna, to szyba bezpieczne zapewniające bezpieczeństwo użytkowania (hartowana lub VSG).

Model Perfect 17-1 - d0, Perfect d15, Perfect d16, Perfect d17

Model Perfect 18-1 - d0, Perfect d15, Perfect d16
Double-leaf doors intended for larger mounting holes have two open-able wings, larger sash (active) and smaller (passive) sash with a blockade, performed on the ALU / 75, ALU / 54.10 / 54.15 / 54 door frame depending on the selected model. Can be combined with transoms (only on the ALU / 75, ALU / 54 door frame). Passive wings available in sizes “30” and “40”.

ATTENTION! We recommend that double leaf door to have an outward opening. Installation of opening doors inwards should only be made in if the entrance is shielded, example roof, from weather conditions.

**ATTENTION**

No possibility of making extra beds with laminated frame in the following colors: Anthracite smooth, Metbrush, Black mat.
Doors with extensions are made on the aluminum frame ALU / 75, ALU54. Both extensions have hinges but are not open. Can be combined with transoms (only on the ALU / 75, ALU / 54 door frame). Passive wings available in sizes "30" and "40". The add-ons have a separate (own) door frame, which is connected to the door leaf. the extra bed can be mounted from any side.

ATTENTION! We recommend that double leaf door to have an outward opening. Installation of opening doors inwards should only be made in if the entrance is shielded, example roof, from weather conditions.

### Available door widths

#### With One OR Two SIDE PANELS

**Available door widths with One extra bed - wing .100*:**
- 110° 80+30
- 120° 90+30
- 130° 100+30
- 120° 80+40
- 130° 90+40
- 140° 100+40

**Available door widths with two extra beds - wing .100**:
- 140° 30+80+30
- 160° 40+80+40
- 170° 40+90+40
- 150° 30+90+30
- 160° 30+100+30
- 180° 40+100+40

**Accessories for an additional charge**

- Available by offers on the page 48-53

### Additional options

- Shorten max. 130 mm
- Door closer
- GAMA COLOR
Dopłata wg. cennika str. 75
Podane ceny są cenami netto (+8% lub 23% VAT)

Dostawki posiadają osobną (własną) ościeżnicę, która łączona jest z ościeżnicą skrzydła. Dostawkę można zamontować z dowolnej strony.

Drzwi z dostawkami wykonywane są na ościeżnicy aluminiowej ALU/75, ALU/54. Obie dostawki posiadają zawiasy ale nie są otwierane.

Przykład:

Przeszklenia w dostawkach
- Diament czarny
- Diament biały
- Diament
- Reflex z witrażem
- Lustro weneckie
- Łezki
- Reflex wypukły
- Reflex
- Mleczna
- Przezroczysta d2, d3, d4, d5, d6, d7, d9, d11, d14
- Mleczna 01 P4*
- Przezroczysta P4*d3, d5, d7, d9, d11
- Grafit

Możliwość łączenia z naświetlami (tylko na ościeżnicy ALU/75, ALU/54). Skrzydła bierne dostępne w rozmiarach “30” i “40”.

Podstawowy do wewnątrz należy wykonywać tylko we wnękach całkowicie osłaniających wejście przed opadami atmosferycznymi.

Sposób wyliczania ceny zestawu drzwi z jedną lub dwiema dostawkami nieotwieranymi

- GAMA COLOR painting in RAL color *
TOP LIGHT PANEL

Model 13s4 + side light

It is possible to connect the transom lights with single-leaf, double-leaf doors and unopened extensions, only on the ALU door frame.

The method of calculating the dimensions of the door structure with transoms:

<table>
<thead>
<tr>
<th>Total width of the frame (Sc)</th>
<th>Total height of the frame (Hc)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ALU/54, ALU/75</td>
<td>ALU/54 - 2072 mm</td>
</tr>
<tr>
<td>.80” - 917 mm</td>
<td>ALU/90 - 2093 mm</td>
</tr>
<tr>
<td>.90” - 1017 mm</td>
<td>ALU/75 - 2075 mm (2085 4P)</td>
</tr>
<tr>
<td>.100” - 1117 mm</td>
<td></td>
</tr>
<tr>
<td>.80” - 948 mm</td>
<td></td>
</tr>
<tr>
<td>.90” - 1048 mm</td>
<td></td>
</tr>
<tr>
<td>.100” - 1148 mm</td>
<td></td>
</tr>
</tbody>
</table>

+ sidelight width = total width of the set
+ height of the upper transom = total height of the set

Available full panels and glazing for side and top transoms:

  (RAL colours)
- Top light panel clear glass  
  (RAL colours)
- Panel full
- Glass Matte available Glass P4
- Reflex
- Glass Clear available Glass P4  
  *
- Mirror Venetian  
  *
Handles

In our offer you will find Pull door handles made of the highest quality stainless steel (inox) and anodized aluminum (black, stylized-inox and black), which guarantees high durability and resistance to weather conditions. The pull handle is characterized by a modern and effective look, solid performance, functionality and the availability of many models at attractive prices.

Pull handle one-sided

The price of a one-sided basic inox or black handle includes the GAMA basic handle without security one-sided inox or black - the color of the handle depends on the color of the handle

For an extra charge, it is possible to change the basic handle to GAMA with inox or black anti-drilling protection

For an additional charge, it is possible to change the basic handle to LAMBDA inox or black

Pull handle double-sided standard

The price of a double-sided stainless steel or black handle includes double-sided LAMBDA signs - the color of the signs depends on the color of the handle (the two-sided pull handle has no handle)

Pull handle one-sided stylized

The price of a stylized inox or black handle includes a one-sided LAMBDA handle - the color of the signs depends on the color of the handle (the two-sided pull handle does not have a handle)

Stylized pull handles are dedicated to models: Perfect 1, 2, 3, 5, 7, 7-1, 7-2, 8, 8-1, 9, 9 A, 9 B, 17-1, 18-1, Flat

Pull handle round, square and decorated are dedicated to the following designs: Perfect, Flat 10, 11, 13, 14, 15, 16

ATTENTION | Unable to use door handles:
- Anti-burglary RC 2 and RC 3
- Perfect 9
**DOOR OPENING OPTIONS WITH A PULL HANDLE**

**PASSIVE**
Pull handle one-sided or two-sided (espagnolette operated automatically)
1. The door can be opened with a key.

**SUPERTHERM**
Pull handle single or double-sided (espagnolette controlled automatically)
The possibilities of opening the door with:
1. Fingerprint reader
2. Key
3. (espagnolette controlled by a fingerprint reader or code keyboard - version with power supply and contacts built into the frame - Secure Connect)

**PASSIVE**
Pull handle one-sided or two-sided + electromagnetic lock (espagnolette mechanically controlled)
The door can be opened with:
1. Handrail (electric strike in the "day" function with a roller lock).
2. Key (electric strike in the "night" function)

**SUPERTHERM**
Pull handle (espagnolette controlled automatically)
1. The door can be opened with a key

**PASSIVE**
Pull handle with + Electro catch (mechanically controlled espagnolette)
The door can be opened with:
1. Handrail (Electro catch in the "night" of roller lock connected to the power supply via the power supply).
2. With a key (electric strike in the "night" function).

**SUPERTHERM**
Pull handle + Electro catch (espagnolette controlled mechanically)
The door can be opened with:
1. Handrail (Electro catch in the "day" function, door closer required).
2. Wrench - Electro catch in the "night" function

**SUPERTHERM**
Pull handle with + Electro-catch (mechanically controlled espagnolette)
The door can be opened with:
1. Handrail (connection to power supply required through the power supply).
2. Key

**Electro-catch + Roller Lock**
- Adapted to the 12/24 V power supply, the roller lock protects the door against automatic opening, with the option of adjusting the pressure force.
- The "day - night" function (enables opening the door from the outside without using a key).
